The numerous expeditionary installations established throughout the Middle East in the Global War on Terrorism (GWOT) offer a clean slate for transition to a policy that favors sustainable design as well as host nation acceptance through the use of indigenous architecture. By investigating desert indigenous architecture, low-tech design elements could be rediscovered and combined with modern technology to build new, environmentally-responsible buildings that are identifiable by the local culture. The potential of indigenous architecture was investigated by comparing its energy performance, force protection and fire safety characteristics, and ease of procurement to the same criteria for a standard prefabricated metal building. The core of the research was a literature review of current Department of Defense (DoD) construction standards and an examination of past and present examples of desert architecture including the Middle East and the southwestern U.S. Architectural drawings for a typical administration facility were created...
